Re: MPM Investment Group
WNAU (AM), New Albany, Mississippi
Facility Identification Number: 7070
Special Temporary Authority

Dear Counsel:

This is in reference to the request filed May 23, 2011, on behalf of MPM Investment Group ("MPM"). MPM requests further extension of the special temporary authority ("STA") granted on January 13, 2009, to operate Station WNAU with emergency antenna facilities pursuant to Section 73.1680.¹ In support of the request, MPM states that it has discovered additional problems, including the need to replace sampling lines.

Requests for extension of STA will be granted only where the licensee can show that one or more of the following criteria have been met:

- Restoration of licensed facilities is complete and testing is underway;
- Substantial progress has been made during the most recent STA period toward restoration of licensed operation; or
- No progress has been made during the most recent STA period for reasons clearly beyond the licensee's control, and the licensee has taken all possible steps to expeditiously resolve the problem.

Our review indicates that the licensee been prevented from restoring licensed operation due to causes beyond its control and has taken all possible steps to resolve the problem. Thus, extension of STA is warranted.

Accordingly, the request for extension of STA IS HEREBY GRANTED. Station WNAU may operate during nighttime hours with parameters at variance and/or reduced power while maintaining monitor points within licensed limits. Operation with an emergency nondirectional antenna and reduced power not to exceed 0.125 kilowatt also is authorized, only as necessary

¹ WNAU is licensed for operation on 1470 kHz with 2.5 kilowatts daytime and 0.5 kilowatt nighttime, employing a directional antenna during nighttime hours only (DA-N-U).

pending restoration of directional operation. It will be necessary to further reduce power or cease operation if complaints of interference are received. MPM must notify the Commission when licensed operation is restored.² MPM must use whatever means are necessary to protect workers and the public from exposure to radio frequency radiation in excess of the Commission's exposure guidelines. *See* 47 CFR § 1.1310.

This authority expires on **February 2, 2012**.

Sincerely,

A handwritten signature in blue ink, appearing to read "Charles N. Miller", with a long horizontal flourish extending to the right.

Charles N. Miller, Engineer
